The program meets or exceeds an 80% pass rate on state licensure exams:

- ⊙ Yes
- ⊙ No
- ⊙ Not applicable
- ⊙ Not able to determine

Comment:

Test results are very strong for these candidates. The institution has been studying the results carefully and has made program changes to better prepare the students for the tests.

Summary of Strengths:

The institution has worked very hard in the revised report to attend specifically to the mathematics education students' preparation both in new, extensive rubrics, new instructional tasks, and the assurance that the mathematics education faculty are providing the instructional feedback and the supervision. The clarifications from the previous report show further evidence of the faculty's commitment to improvement and a standards-based program.

PART B - STATUS OF MEETING SPA STANDARDS

Standard 1. Knowledge of Problem Solving. Candidates know, understand and apply the process of mathematical problem solving.

Indicators:

1.1 Apply and adapt a variety of appropriate strategies to solve problems.

Met	Not Met
⊙	⊙

1.2 Solve problems that arise in mathematics and those involving mathematics in other contexts

Met	Not Met
⊙	⊙

1.3 Build new mathematical knowledge through problem solving.

Met	Not Met
⊙	⊙

1.4 Monitor and reflect on the process of mathematical problem solving.

Met	Not Met

mathematical arguments and develop an appreciation for mathematical rigor and inquiry.

Indicators:

2.1 Recognize reasoning and proof as fundamentals aspects of mathematics.

Met   Not Met

  ʲₙ   ʲₙ

   2.2 Make and investigate mathematical conjectures

Met   Not Met

  ʲₙ   ʲₙ

   2.3 Develop and evaluate mathematical arguments and proofs.

Met   Not Met

  ʲₙ   ʲₙ

   2.4 Select and use various types of reasoning and methods of proof.

Met   Not Met

  ʲₙ   ʲₙ

   Standard 2 comments:

Mathematics course descriptions further confirm the richness of the coursework.

   Standard 3. Knowledge of Mathematical Communication. Candidates communicate their mathematical thinking orally and in writing to peers, faculty and others.

Indicators:

3.1 Communicate their mathematical thinking coherently and clearly to peers, faculty, and others.

Met   Not Met

  ʲₙ   ʲₙ

   3.2 Use the language of mathematics to express ideas precisely.

Met   Not Met

  ʲₙ   ʲₙ

   3.3 Organize mathematical thinking through communication

Met   Not Met

  ʲₙ   ʲₙ

   3.4 Analyze and evaluate the mathematical thinking and strategies of others.

Standard 15 comments:

See Standard 13.

Standard 16. Field-Based Experiences. Candidates complete field-based experiences in mathematics classrooms.

Indicators:

16.1 Engage in a sequence of planned opportunities prior to student teaching that includes observing and participating in both middle and secondary mathematics classrooms under the supervision of experienced and highly qualified teachers.

Met   Not Met

j̲n̲   j̲n̲

16.2 Experience full-time student teaching in secondary mathematics that is supervised by a highly qualified teacher and a university or college supervisor with secondary mathematics teaching experience.

Met   Not Met

j̲n̲   j̲n̲

16.3 Demonstrate the ability to increase students' knowledge of mathematics.

Met   Not Met

Standard 16 comments:

The report's clarifications and further detail for Assessments 3-6 provide much stronger evidence for this standard, particularly since mathematics educators supervise, provide feedback, and show evidence of how they have used these standards to change assignments and strengthen programs.

PART C - EVALUATION OF PROGRAM REPORT EVIDENCE

C.1. Candidates' knowledge of content

Candidates' evidence from test scores, coursework, and assessments in field experience show their ability to demonstrate mathematical knowledge. The program's course sequence has been changed and strengthened based upon analysis of data.

C.2. Candidates' ability to understand and apply pedagogical and professional content knowledge, skills, and dispositions

Carefully structured, meaningful assessments in the mathematics methods course and in the student teaching experience provide ample evidence that candidates are expected to be knowledgeable of the standards and use them. Feedback is provided from professors and supervisors who are mathematics educators.

C.3. Candidate effects on P-12 student learning

The TeacherWork Sample as well as the student teaching assessment provide indication of specific analysis of student learning. The faculty are collecting and using ure collec.28 l53.28 4Td(ed6 37lty ar1Ea9ting and

PART G - DECISIONS

Please select final decision:

j̇n Program is nationally recognized. The program is recognized through the semester and year of the institution's next NCATE accreditation decision in 5-7 years. To retain recognition, another program report must be submitted before that review. The program will be listed as nationally recognized through the semester of the next NCATE accreditation decision on websites and/or other publications of the SPA and NCATE. The institution may designate its program as nationally recognized by NCATE, through the semester of the next NCATE accreditation decision, in its published materials. National recognition is dependent upon NCATE accreditation.
